PROFESSIONAL SUMMARY

Software Engineering undergraduate specializing in Frontend Development and UI Implementation. Passionate about crafting pixel-perfect, responsive user interfaces using Next.js and Flutter. Unique advantage of possessing strong Backend capabilities (Laravel), enabling independent end-to-end feature development and seamless API integration.

TECHNICAL SKILLS

- **Languages:** PHP, Dart, JavaScript, TypeScript, HTML, CSS.
- **Frameworks:** Laravel, Next.js, Flutter, Bootstrap, Tailwind CSS.
- **Tools & Database:** Git, GitHub, GitLab, MySQL, Postman, VS Code.

WORK EXPERIENCE

Freelance Full Stack Engineer

May 2025 – August 2025

Dewata Management

Bali, Indonesia

- Engineered a comprehensive **Property Management System** consisting of a Next.js public website, a Laravel backend API, and a Flutter mobile application.
- Developed an internal **Flutter mobile app** for owners to monitor real-time revenue, occupancy rates, and booking details.
- Implemented complex **system integration** by syncing Airbnb's iCal data feed to synchronize bookings in real-time, preventing double-bookings.
- Designed secure REST APIs with Laravel to facilitate efficient data flow between the mobile app, website, and database.
- Crafted a responsive, SEO-friendly user interface using **Next.js and Tailwind CSS**.

Junior Front End Developer (Intern)

June 2023 – September 2023

PT. Ganeshcom Studio

Bali, Indonesia

- Revamped the corporate digital presence for **Reka Media Creative**, utilizing Laravel and Bootstrap.
- Optimized frontend performance using jQuery for dynamic UI elements, improving site interactivity.
- Managed code collaboration and versioning using **GitLab** in an agile team environment.

Junior Front End Developer (Intern)

December 2022 – February 2023

PT. Ruang Berkarya Teknologi

Bali, Indonesia

- Developed the ISP website "Jinus" using Bootstrap for the frontend and integrated it with a Laravel backend.
- Architected a custom **CMS feature** to allow non-technical staff to manage website content efficiently.

EDUCATION

Telkom University

Bandung, Indonesia

Bachelor of Software Engineering (S1)

Expected Graduation: 2027

Current Semester: 3 (Relevant Coursework: Web Development, Algorithm & Data Structures)

SMK Negeri 1 Denpasar

Bali, Indonesia

Vocational High School in Software Engineering (RPL)

Graduated: December 2023

ACHIEVEMENTS

- **3rd Place Winner, Digital Application Challenge #1 (Aug 2025):** Developed "VISIONARY," an innovative project utilizing Computer Vision technology to solve real-world problems.
